

Last Minute Change Of Plans For Curriculum Of Woods II Class

Typically, the curriculum for Woods II would be based on cabinetmaking. However, we have the opportunity to build a rather large shed for the City of Ogden's Youth Baseball and Softball Program at the elementary school fields.

It will be a great project and the students will gain very valuable building experience. Once we have that project done, we will build a few high-quality picnic tables as the demand has been incredible and we have been asked to build a few more.

The storage shed will not produce any money for the shop as we are doing it free of charge. The City will pay for the supplies. The picnic tables show us some profit that we feed back into our shop account.
